Statement of NGO Little People of Kosovo

Date: 28.September, 2005.

People with disability are minorities in each society. Position of people with disability is especially difficult in Balkan's Region.

We need support from OSCE countries to improve our position to fight discripe including in the areas of:

- employment possibilities
- education
- health care
- access to media and in many other areas
- most of OSCE countries lack adequate Laws to protect the right of persons with disabilities.

We do like to send message:

**... and we have rights ...**
